We would be happy to send you the certificates for the product information on the upholstery fabrics.

Sustainability

That's why we rely on Camira for the design, manufacture and delivery of our upholstery fabrics: Reducing, reusing and recycling for over 20 years.

From developing the first recycled polyester fabric in 1997 to launching Oceanic in 2020 – the first textile to contain ocean plastic waste – Camira's commitment to producing beautiful fabrics without harming the environment is long-standing and sustainable. With the aim of pushing the boundaries of environmentally conscious design, they have developed industry-leading textile innovations that offer the aesthetics and durability our customers demand – while always working towards realising their vision of a sustainable textile industry.

Based on the partnership between fabric manufacturer Camira and the SEAQUAL initiative, which fights against plastic waste in our oceans, the Quest and Oceanic upholstery fabrics are responsibly manufactured. The fabrics are woven entirely from recycled plastic waste from post-consumer plastic.

The RePlay collection is also made from 100% post-consumer polyester, making it an environmentally conscious textile that minimises its impact on the environment and takes a new approach to plastic.
