

BRIXX Single

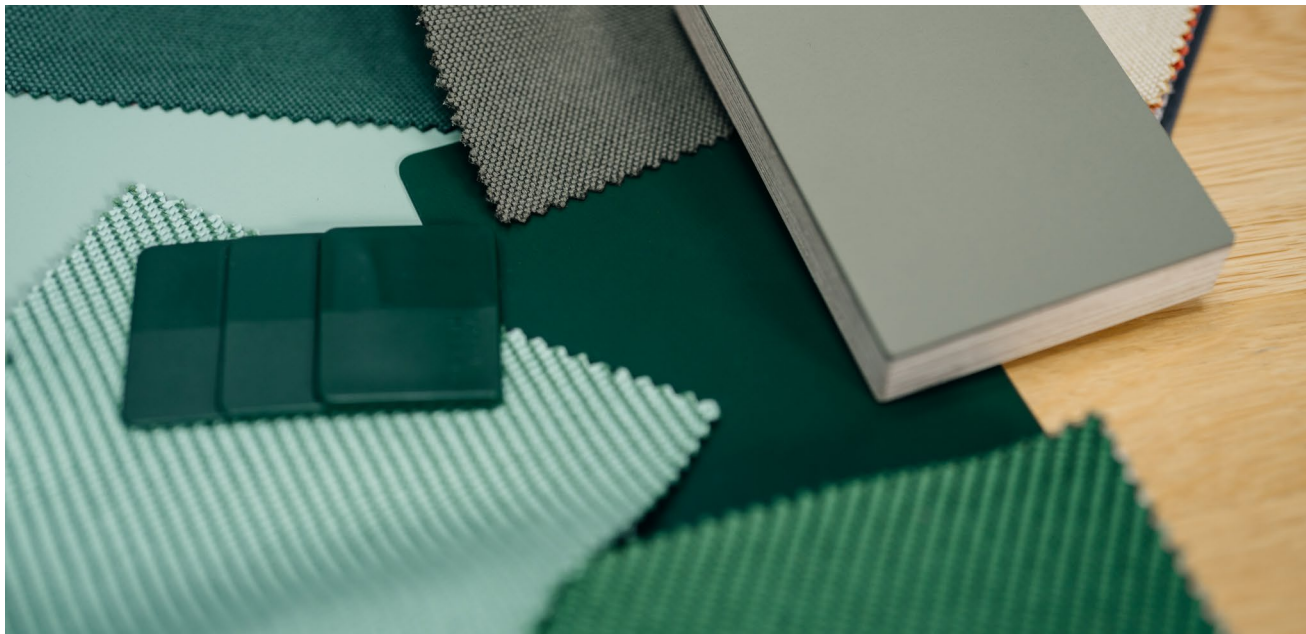

Recommended use	Schools, universities, educational institutions, seminar rooms
Use	Modular platform element for assembly in open learning areas, differentiation areas, auditoriums and many other room situations – wherever a gathering place is needed. Can be combined with BRIXX Double. The modules can be conveniently gripped by the rounded recessed handles, transported and stacked on top of each other without slipping thanks to the raised edge.
Material	3-layer solid wood panel, spruce, 19 mm, firmly glued, lacquered on both sides. The machine-sorted lamellas create a balanced wood appearance. Thanks to the environmentally friendly 3-layer gluing in combination with the strong top layers, the raw material wood retains all its good properties and is also more stable and durable. The quality of the 3-layer natural wood panel is precisely monitored through ongoing research and the strictest controls.

Certificates	Certified as non-combustible in accordance with DIN EN 13501-1:2019-05 with classification A2.
Cleaning & Care	Spruce 3-layer wood 

Dimensions may vary due to material and production tolerances
Subject to technical changes, errors and colour variations.

WE LOOK FORWARD TO SEEING

	Flötotto Einrichtungssysteme GmbH An der Manufaktur 4 33334 Gütersloh Germany
Consultancy	FLÖTOTTO is a key development partner for school authorities, architects, ministries and is in daily close contact with the teachers responsible in the respective schools. Together, we create flexible, age-appropriate educational spaces for intensive interaction between learners and teachers. The living and learning spaces we develop improve learning outcomes and, together with the architecture, ideally also have a positive impact on the immediate vicinity of the school location. We remain your first point of contact until the project is completed and even years afterwards. Get in touch with us, we will be happy to advise you!
