Consulting

FLÖTOTTO is a key development partner for school authorities, architects and ministries, and engages in intensive daily dialogue with the teachers responsible in the respective schools. Together, we create flexible, age-appropriate educational spaces that promote intensive interaction between learners and teachers. The living and learning spaces we develop improve learning outcomes and, together with the architecture, also have a positive impact on the immediate vicinity of the school location.

We remain your primary point of contact until the project is completed and for years afterwards.

Please contact us, we will be happy to advise you!
